

FUNDAMENTALS OF HEALTH AND DISEASE FROM AN ALTERNATIVE POINT OF VIEW

Saturday - May 19th - 2007

Speaker: Marty Goldstein, DVM

**Talk show host of “Ask Martha’s Vet” on Martha Stewart Sirius Radio Network
Founding member of American Holistic Veterinary Medical Association
Author of “The Nature Of Animal Healing”**

This program initially deals with an overview of disease; a breakdown of contributing factors, it’s actual role and purpose on the earth and then, the correct approach to handle the disease state to re-establish and maintain health in **both animals and their people**. Within this section we will explore the basic rules of proper nutrition, metabolic balancing and alternative approaches to treating common ailments and conditions in animals such as fleas, heartworm, routine illness and many more. A full discussion with documentation on the controversial vaccination issue will be discussed.

From here, the lecture broadens to cover alternative topics and healing practices such as acupuncture, chiropractic, homeopathy, iridology (the study of the relationship of the iris to the body), emotional and vibrational therapy (energy medicine), the death process and a full disclosure on cancer, what it is, how the immune system functions or dysfunctions during cancer and the methods to successfully and non-toxically treat this formerly dread disease. Immuno Augmentive Therapy as a treatment for cancer as well as others will be clearly explained.

The seminar is complemented by a 500 slide power point presentation which will tie in all of the above topics showing documentation to include before and after case studies as well as cause and effect pictures. **Come learn the secrets to living healthier and longer lives for you and your animals.**

Location:	Rochester Academy of Medicine 1441 East Avenue, Rochester, NY
Time:	9 AM to 5 PM (lunch included)
Fee:	\$65.00 WNYDA members \$75.00 Non- members
